

## PUBLIC-PRIVATE PARTNERSHIPS

---

**Strategic Partnerships, Inc. (SPI) is a trusted link between public entities and private firms interested in public-private partnerships.**

SPI's senior strategists are all former public sector executives, including agency chiefs, elected officials, CFOs, COOs, city managers, chancellors, military officers and superintendents.

These procurement professionals are available to speak with public entities and provide intelligence, research and advice ... at no cost.

We are available to share with public entities what we have learned over the past 15+ years.

- **Research** – Trends, successes, failures, P3s in other countries
- **Advice** – Why some P3s fail, why others succeed; what makes a true P3
- **Intelligence** – Various P3 models and which ones work best in certain situations

***“Following the recent economic downturn, government will most likely never operate the same again. P3s are quickly becoming an attractive option for governmental entities at all levels of jurisdiction.”***
