| West Penobscot Telephone And Telegraph Company | ME | \$1,554,981 | This \$1.5 million grant to the West Penobscot Telephone and Telegraph Company with an additional \$518,000 of outside capital will bring high-speed DSL broadband service to unserved establishments within its rural service territory, which is comparable to the DSL service provided in its more populated areas. West Penobscot Telephone and Telegraph Company's project stands to benefit approximately 1027 people and 12 businesses. In addition to the jobs this project will create upfront, it will help drive economic development and create jobs for decades to come. |
| Island Telephone Company | MI | \$2,001,528 | This \$2 million grant to Island Telephone Company with an additional \$667,000 of outside capital will bring high-speed DSL broadband service to unserved establishments within its rural service territory, which is comparable to the DSL service provided in its more populated areas. Island Telephone Company's project stands to benefit approximately 588 people, 35 businesses, and 3 other community institutions. In addition to the jobs this project will create upfront, it will help drive economic development and create jobs for decades to come. |
| Wikstrom Telephone Company, Incorporated | MN | \$7,398,600 | This \$7.4 million grant to Wikstrom Telephone Company, Inc. will deploy 414 miles of new cables and electronics for GPON fiber to the home in 6 communities of Kittson, Marshall and Roseau County for Broadband Services over 100 megabits. Electronic enhancements will be made to existing DSL customers to increase Broadband speeds up to 48mbs, along with 74 miles of additional fiber to the node, and a 150mb microwave upgrade for service to the NW Angle. Wikstrom Telephone's project stands to benefit approximately 12,000 people, 1,500 businesses, and 83 other community institutions. In addition to the jobs this project will create upfront, it will help drive economic development and create jobs for decades to come. |
| Orchard Farm Telephone Co. | MO | \$604,794 | This \$604,000 grant to Orchard Farm Telephone Company with an additional \$201,000 of outside capital will bring high-speed DSL broadband service to unserved establishments within its rural service territory, which is comparable to the DSL service provided in its more populated areas. Orchard Farm Telephone's project stands to benefit approximately 221 people, 47 businesses, and 3 other community institutions. In addition to the jobs this project will create upfront, it will help drive economic development and create jobs for decades to come. |

| Applicant Name | State | Award Amount | Project Description |
|--|-------|--------------|--|
| Grand River Mutual Telephone Corporation | MO | \$12,363,759 | This \$12.3 million grant to Grand River Mutual Telephone Company will provide broadband service to the towns of Browning, Purdin, Linneus, and Meadville, Missouri, and their surrounding rural areas via a fiber-to-the-home (FTTH) network. Grand River Mutual Telephone's project stands to benefit approximately 2,800 people, 750 businesses, and 20 other community institutions. In addition to the jobs this project will create upfront, it will help drive economic development and create jobs for decades to come. |
| Grand River Mutual Telephone Corporation | MO | \$8,970,781 | This \$9 million grant to Grand River Mutual Telephone Company will provide broadband service to the towns of Denver, Gentry, and New Hampton, Missouri, and their surrounding rural areas via a fiber-to-the-home network. Grand River Mutual Telephone's project stands to benefit approximately 1,500 people, 350 businesses, and 8 other community institutions. In addition to the jobs this project will create upfront, it will help drive economic development and create jobs for decades to come. |
| Southeast Mississippi Telephone Company, Inc | MS | \$1,875,204 | This \$1.8 million grant to Southeast Mississippi Telephone Company with an additional \$625,000 of outside capital will bring high-speed DSL broadband service to unserved establishments within its rural service territory, which is comparable to the DSL service provided in its more populated areas. Southeast Mississippi Telephone's project stands to benefit approximately 1428 people, 12 businesses, and 5 other community institutions. In addition to the jobs this project will create upfront, it will help drive economic development and create jobs for decades to come. |
| Nemont Telephone Co-Operative, Inc. | MT | \$25,993,900 | This \$26 million award to Nemont Telephone Cooperative, Inc. will provide Fiber to the Premise (Home) to all locations within the Fort Peck Indian Reservation exchanges of Brockton, Froid Rural, North Poplar, North Wolf Point, and Frazer that do not currently have access to 5Mbs (up and down combined). This project will also bring Fiber to the Premise to the exchange of Poplar which is the headquarters of the Fort Peck Assiniboine-Sioux Tribes. The service will be accessible by each location and delivered by GPON and/or active Ethernet topologies. Nemont Telephone Cooperative's project stands to benefit approximately 7,250 people, 200 businesses, and 40 other community institutions. West Nemont Telephone Cooperative estimates that this project will directly create more than 280 jobs upfront and help drive economic development in the community that creates jobs for years to come. |

| Applicant Name | State | Award Amount | Project Description |
|---|---------------------|--------------|--|
| Utopian Wireless Corporation | NC | \$460,993 | This \$460,000 award to Utopian Wireless Corporation will bring WiMax infrastructure to rural communities in and around Riegelwood, NC and will provide broadband access to underserved household and businesses. The Utopian Wireless Corporation's project stands to benefit approximately 3,000 people, 450 businesses, and 30 other community institutions. In addition to the jobs this project will create upfront, it will help drive economic development and create jobs for decades to come. |
| Inter-Community Telephone Company Inc | ND | \$2,338,651 | This \$2.3 million award to Inter-Community Telephone Company will improve broadband connectivity for critical community facilities in the communities of Hope, Sanborn, and Tower City, ND. Inter-Community Telephone Company's project stands to benefit over 850 people and over 30 businesses, and other community institutions. In addition to the jobs this project will create upfront, it will help drive economic development and create jobs for decades to come. |
| Port Byron Telephone Co Inc | NY | \$639,218 | This \$640,000 grant to Port Byron Telephone Co. Inc with an additional \$200,000 of outside capital will bring high-speed DSL broadband service to unserved establishments within its rural service territory in New York. Port Byron's project stands to benefit approximately 400 people, as well as several businesses and other community institutions. In addition to the jobs this project will create upfront, it will help drive economic development and create jobs for decades to come. |
| Deposit Telephone Company, Inc. | NY (96%) PA (4%) | \$3,143,839 | This \$3.1 million grant to Deposit Telephone Company with an additional \$1 million of outside capital will bring high-speed DSL broadband service to unserved establishments in New York and Pennsylvania. Deposit Telephone's project stands to benefit approximately 2,700 people and over 70 businesses. In addition to the jobs this project will create upfront, it will help drive economic development and create jobs for decades to come. |
| Southern Ohio Communication Services, Inc | OH | \$1,448,441 | This \$1.4 million award will provide broadband and Voice Over Internet Protocol services to the unserved and underserved population in Pike Counties, Ohio. Southern Ohio's project stands to benefit approximately 14,000 people, 180 businesses, and several other community institutions. Southern Ohio estimates that this project will directly create at least 400 jobs upfront and help drive economic development in the community that creates jobs for years to come. |

| Applicant Name | State | Award Amount | Project Description |
|--------------------------------------|----------------------------|--------------|---|
| Utopian Wireless Corporation | OH | \$1,395,703 | This \$1.4 million award will bring WiMax infrastructure to rural communities in and around Kinsman, Ohio, and will provide broadband access to underserved households and businesses as well as discounted services. Utopian Wireless' project stands to benefit approximately 7,000 people, and 600 businesses, and other community institutions. In addition to the jobs this project will create upfront, it will help drive economic development and create jobs for decades to come. |
| Windstream Corporation | OK | \$2,279,598 | This \$2.3 million grant to Windstream Corporation with an additional \$760,000 of outside capital will provide digital phone, high-speed internet and high-definition video and entertainment services to residential and business customers. Windstream's project stands to benefit approximately 4,000 people, and several businesses and other community institutions. In addition to the jobs this project will create upfront, it will help drive economic development and create jobs for decades to come. |
| Highland Telephone Cooperative, Inc. | TN (71%) KY (29%) | \$66,489,162 | This \$66 million award to Highland Telephone Cooperative will provide state-of-the-art communication services while enhancing broadband communication options for Morgan and Scott Counties, Tennessee and McCreary County, Kentucky. Highland Telephone's project stands to benefit approximately 52,000 people, 1,800 businesses, and 100 other community institutions. In addition to the jobs this project will create upfront, it will help drive economic development and create jobs for decades to come. |
| Utopian Wireless Corporation | VA | \$468,133 | This \$468,000 award to Utopian Wireless will bring WiMax infrastructure to communities in and around Mineral, Virginia. Utopian Wireless' project stands to benefit approximately 4500 people, 400 businesses, and 50 other community institutions. In addition to the jobs this project will create upfront, it will help drive economic development and create jobs for decades to come. |
| New Castle Telephone Company | VA | \$1,066,321 | This \$1 million award to New Castle Telephone Company with an additional \$355,000 applicant-provided match will bring high speed DSL broadband service to unserved establishments within its rural service territory in Virginia. New Castle's project stands to benefit approximately 700 people, and several businesses, and other community institutions. In addition to the jobs this project will create upfront, it will help drive economic development and create jobs for decades to come. |

| Applicant Name | State | Award Amount | Project Description |
|-------------------------------------|-------|--------------|---|
| McDaniel Telephone Company | WA | \$1,192,951 | This \$1.2 million grant to McDaniel Telephone Company with an additional \$398,000 applicant-provided match will bring high-speed DSL broadband service to unserved establishments within its rural service territory in Washington. McDaniel Telephone's project stands to benefit approximately 1,400 people, and several businesses. In addition to the jobs this project will create upfront, it will help drive economic development and create jobs for decades to come. |
| Midway Telephone Company | WI | \$4,680,738 | This \$4.7 million grant to Midway Telephone Company with an additional \$1.6 million of outside capital will bring high-speed DSL broadband service to unserved establishments within its rural service territory in Wisconsin. Midway Telephone's project stands to benefit approximately 2,700 people, 50 businesses, and 20 other community institutions. Midway Telephone estimates that this project will directly create at least 100 jobs upfront and help drive economic development in the community that creates jobs for years to come. |
| Farmers Telephone Company, LLC, The | WI | \$1,440,570 | This \$1.4 million grant to Farmer's Telephone Company with an additional \$480,000 of outside capital will bring high-speed DSL broadband service to unserved establishments within its rural service territory in Wisconsin. Farmers Telephone's project stands to benefit approximately 1,000 people, 30 businesses, and several other community institutions. In addition to the jobs this project will create upfront, it will help drive economic development and create jobs for decades to come. |
| Tohono O'Odham Utility Authority | AZ | \$10,307,000 | This \$10.3 million award to Tohono O'Odham Utility Authority will provide fiber to the home and broadband wireless hot-spot capabilities to further enhance the existing broadband base in the Tribunal area, Arizona. Tohono's project stands to benefit approximately 6,500 people, 1,300 businesses, and 60 other community institutions. Tohono estimates that this project will directly create at least 100 jobs upfront and help drive economic development in the community that creates jobs for years to come. |
| Softcom Internet Communications Inc | CA | \$6,758,835 | This \$6.8 million award to Softcom Internet Communications will provide 100% broadband availability to a large and underserved rural area. Softcom's project stands to benefit approximately 14,000 people, 4,200 businesses, and several other community institutions. In addition to the jobs this project will create upfront, it will help drive economic development and create jobs for decades to come. |

| Applicant Name | State | Award Amount | Project Description |
|-----------------------------|-------|--------------|--|
| Calaveras Telephone Company | CA | \$4,086,976 | This \$4.1 million award to Calaveras Telephone Company with an additional \$2.3 million of outside capital will bring robust infrastructure of fiber-to-the-home technology to its existing customer footprint in Calaveras County. Calaveras' project stands to benefit approximately 1,000 people, and several businesses. In addition to the jobs this project will create upfront, it will help drive economic development and create jobs for decades to come. |
| SmarterBroadband | CA | \$2,498,724 | This \$2.5 million award to SmarterBroadband will bring high quality fixed wireless service to one of the more geographically challenging areas in California. SmarterBroadband's project stands to benefit more than 33,000 people, 3,500 businesses, and approximately 300 community institutions. In addition to the jobs this project will create upfront, it will help drive economic development and create jobs for decades to come. |
| Windstream Corporation | FL | \$38,288,349 | This \$38 million grant to Windstream Corporation with an additional \$12.7 million of outside capital will bring high quality fixed wireless service to one of the more geographically challenging areas in California. Windstream Corporation's project stands to benefit approximately 120,000 people, 4,750 businesses, and 150 community institutions. Windstream Corporation estimates that this project will directly create approximately 225 jobs upfront and help drive economic development in the community that creates jobs for years to come. |
| Myakka Communications, Inc. | FL | \$7,855,726 | This \$7.9 million award to Myakka Communications, Inc. will deploy fiber optic cable in the rural Eastern portions of Manatee and Sarasota Counties allowing speeds up to 20 megabytes per second. Myakka Communication's project stands to benefit approximately 5,000 people, 2,000 businesses, and 15 community institutions. In addition to the jobs this project will create upfront, it will help drive economic development and create jobs for decades to come. |
| Lifestream Holdings LLC | FL | \$5,053,427 | This \$5 million grant to Lifestream Holdings, LLC will extend its existing fiber trunk to serve over 940 unserved locations in a rural portion of unincorporated St. Lucie County, Florida. The project will deliver High-Speed Internet, Digital Voice, and Digital/High-Definition Video services to these unserved locations. Lifestream's project stands to benefit approximately 1,300 people, 375 businesses, and 15 community institutions. In addition to the jobs this project will create upfront, it will help drive economic development and create jobs for decades to come. |

| Applicant Name | State | Award Amount | Project Description |
|-----------------------------------|-------|--------------|--|
| Farmers' Mutual Telephone Company | IA | \$8,550,953 | This \$8.6 million award to Farmers' Mutual Telephone Company with an additional \$2.1 million of outside capital will be used to construct a fiber-to-the-premises (FTTP) network that provides greater than 20 megabytes per second broadband access to unserved communities. Farmer's Mutual Telephone Company's project stands to benefit approximately 3,700 people, 70 businesses, and 15 other community institutions. Farmer's Mutual Telephone Company estimates that this project will directly create at least 115 jobs upfront and help drive economic development in the community that creates jobs for years to come. |
| Hospers Telephone Exchange, Inc | IA | \$8,325,402 | This \$8.3 million award to Hospers Telephone Exchange will offer fiber-to-the-home (FTTH) service in Hospers, Iowa, and its surrounding rural areas. Approximately 2,000 people stand to benefit across portions of Lyon, O'Brien, Osceola, and Sioux Counties, as do more than 150 businesses and nearly 10 community institutions. In addition to the jobs this project will create upfront, it will help drive economic development and create jobs for decades to come. |
| Utopian Wireless Corporation | IL | \$600,252 | This \$600,000 award to Utopian Wireless Corporation will bring WiMAX infrastructure to rural communities in and around Monmouth, Illinois. Utopian will provide 4G broadband access to underserved households and businesses and provide discounted services to community institutions. More than 10,000 people stand to benefit, as do approximately 290 businesses and nearly 100 community institutions. In addition to the jobs this project will create upfront, it will help drive economic development and create jobs for decades to come. |
| Camden Telephone Company Inc | IN | \$1,089,955 | This approximately \$1 million award to Camden Telephone Company, matched by more than \$350,000 in private contribution, will bring high-speed DSL broadband service to unserved establishments in its rural service territory. This network will be comparable to the DSL service provided in its more populated areas. The network will also be engineered so that it can be easily upgraded at a reasonable cost to meet future needs. More than 700 people stand to benefit, as do nearly 20 businesses. In addition to the jobs this project will create upfront, it will help drive economic development and create jobs for decades to come. |

| Applicant Name | State | Award Amount | Project Description |
|-----------------------------------|-------|--------------|--|
| Tipton Telephone Company Inc | IN | \$1,011,971 | This approximately \$1 million award to Tipton Telephone Company, matched by more than \$350,000 in private contribution, will bring high-speed DSL broadband service to unserved establishments in its rural service territory. This network will be comparable to the DSL service provided in its more populated areas. The network will also be engineered so that it can be easily upgraded at a reasonable cost to meet future needs. Nearly 800 people stand to benefit, as do approximately 50 businesses. In addition to the jobs this project will create upfront, it will help drive economic development and create jobs for decades to come. |
| Tri-County Telephone Company Inc | IN | \$593,273 | This \$593,000 award to Tri-County Telephone Company, matched by nearly \$200,000 in private contribution, will bring high-speed DSL broadband service to unserved establishments in its rural service territory. This network will be comparable to the DSL service provided in its more populated areas. The network will also be engineered so that it can be easily upgraded at a reasonable cost to meet future needs. More than 550 people stand to benefit, as do approximately 10 businesses. In addition to the jobs this project will create upfront, it will help drive economic development and create jobs for decades to come. |
| Home Telephone Company Inc | IN | \$416,743 | This \$416,000 award to Home Telephone Company will bring high-speed DSL broadband service to unserved establishments in its rural service territory. This network will be comparable to the DSL service provided in its more populated areas. The network will also be engineered so that it can be easily upgraded at a reasonable cost to meet future needs. More than 400 people stand to benefit. In addition to the jobs this project will create upfront, it will help drive economic development and create jobs for decades to come. |
| Iowa Tribe Of Kansas And Nebraska | KS | \$764,833 | This \$764,000 award to the Iowa Tribe of Kansas and Nebraska, a sovereign American Indian nation, will be used to build an economical and sustainable Fiber-to-the-Premise (FTTP) network that will serve the technical needs of the Tribe in the 21st century. This area is effectively unserved by broadband today. More than 150 people stand to benefit, as do approximately 12 businesses and 10 community institutions. In addition to the jobs this project will create upfront, it will help drive economic development and create jobs for decades to come. |

| Applicant Name | State | Award Amount | Project Description |
|--|-------|--------------|--|
| Peoples Rural Telephone Cooperative Corp, Inc. | KY | \$25,514,182 | This \$25 million award to the People's Telephone Cooperative Corp. will be used to provide broadband service to users in Jackson and Cow Creek, impoverished rural areas in Kentucky. The project will deploy a Fiber-to-the-Premise (FTTP) architecture that will allow users to experience broadband service at speeds of up to 18 megabytes per second and to enjoy the same economic, educational, and social opportunities that broadband has afforded subscribers in neighboring communities. More than 11,000 people stand to benefit, as do over 100 businesses and 30 community institutions. In addition to the jobs this project will create upfront, it will help drive economic development and create jobs for decades to come. |
| Foothills Rural Telephone Cooperative, Corporation, Inc. | KY | \$20,972,482 | This nearly \$21 million award to the Foothills Rural Telephone Cooperative Corp. will be used to conduct a Fiber-to-the-Premise/Last Mile construction project in parts of Magoffin and Lawrence counties in Kentucky. Nearly 6,000 people stand to benefit, as do almost 800 businesses and 8 community institutions. Foothills Rural Telephone cooperative estimates the construction will directly support more than 300 jobs upfront, and will also drive economic development and create jobs for decades to come. |
| Windstream Corporation | KY | \$951,445 | This approximately \$951,000 award to Windstream Corporation will be used to extend its high-speed DSL network to currently unserved homes and businesses. More than 8,000 people stand to benefit, as do approximately 50 businesses. In addition to the jobs this project will create upfront, it will help drive economic development and create jobs for decades to come. |
| Mikrotec CATV, LLC | KY | \$829,813 | This approximately \$830,000 award to Mikrotec CATV, matched by \$276,000 in private capital, will be used to provide broadband Internet service to the small rural Kentucky communities of Eolia, Oven Fork, and Partridge. Nearly 2,000 people stand to benefit, as do approximately 15 businesses and 5 community institutions. In addition to the jobs this project will create upfront, it will help drive economic development and create jobs for decades to come. |

| Applicant Name | State | Award Amount | Project Description |
|---------------------------------------|-------|--------------|---|
| Crystal Automation Systems, Inc | MI | \$26,497,425 | This more than \$26 million award to Crystal Automation Systems will be used to provides high-speed broadband to rural households and businesses over fixed Wireless WiMax and fiber optic cable that have no other options. The fiber optic backhaul installed between towers is routed past the majority of anchor institutions and more densely populated areas. This makes available very high-capacity to health care, libraries, schools, colleges, government, public housing, community organizations and cell towers. More than 140,000 people stand to benefit, as do nearly 5,000 businesses and more than 700 community institutions. Crystal Automation estimates the project will directly support nearly 150 jobs upfront, and will also drive economic development and create jobs for decades to come. |
| Allband Communications Cooperative | MI | \$8,622,754 | This more than \$8.6 million award to Allband Communications Cooperative will be used to provide Fiber-to-the-Home (FTTH) and Voice Over Internet Protocol services to Allband Communications Cooperative's surrounding rural community in Northeastern Michigan. Nearly 3,800 people stand to benefit, as do 95 businesses and 9 community institutions. Allband Communications estimates the construction will directly support 100 jobs upfront, and will also drive economic development and create jobs for decades to come. |
| Climax Telephone Company | MI | \$3,217,499 | This approximately \$3.2 million award to the Climax Telephone Company, matched by over \$1 million in private contribution, will be used to build Fiber-to-the-Premise (FTTP) service and provide high-speed broadband to the communities of Climax and Scotts, Michigan. Over 1,800 people stand to benefit, as do more than 50 businesses and 9 community institutions. In addition to the jobs this project will create upfront, it will help drive economic development and create jobs for decades to come. |
| Communication Corporation Of Michigan | MI | \$1,221,811 | This approximately \$1.2 million award to Communications Corporation of Michigan, matched by more than \$400,000 in private contribution, will bring high-speed DSL broadband service to unserved establishments in its rural service territory. This network will be comparable to the DSL service provided in its more populated areas. The network will also be engineered so that it can be easily upgraded at a reasonable cost to meet future needs. More than 650 people stand to benefit, as do roughly 10 businesses. In addition to the jobs this project will create upfront, it will help drive economic development and create jobs for decades to come. |

| Applicant Name | State | Award Amount | Project Description |
|------------------------------------|-------|--------------|--|
| Allband Communications Cooperative | MI | \$1,107,903 | This more than \$1.1 million award to Allband Communications Cooperative will be used to provide Fiber-to-the-Home (FTTH) and Voice Over Internet Protocol services to Allband Communications Cooperative's surrounding rural community in Northeastern Michigan. Nearly 500 people stand to benefit, as do 20 businesses. In addition to the jobs this project will create upfront, it will also drive economic development and create jobs for decades to come. |
| Woodstock Telephone Co Inc | MN | \$15,184,424 | Woodstock Telephone Company will use this more than \$15.1 million award to expand its fiber network into neighboring rural communities by providing Fiber-to-the-Premise (FTTP) for over 3600 premises in 15 communities located within 3 counties in Southwest Minnesota. This expanded fiber network will provide bandwidth of over 20megabytes per second for advanced voice and data services. More than 8,000 people stand to benefit, as do approximately 180 businesses and nearly 50 community institutions. In addition to the jobs this project will create upfront, it will help drive economic development and create jobs for decades to come. |
| Farmers Mutual Telephone Company | MN | \$9,652,956 | This approximately \$9.65 million award to Farmers Mutual Telephone Company will bring Fiber-to-the-Premise (FTTP) technology to Minnesota's Lac qui Parle County. This network will make Lac qui Parle, now an area with limited technology choices, one of the leading technology counties in the state. More than 3,700 people stand to benefit, as do roughly 165 businesses and 12 community institutions. Farmers Mutual estimates the construction will directly support 110 jobs upfront, and will also drive economic development and create jobs for decades to come. |
| Arvig Telephone Company | MN | \$5,048,168 | This over \$5 million award to Arvig Telephone Company, matched by nearly \$1.7 million in private contribution, will bring high-speed DSL broadband service to unserved establishments in its rural service territory. This network will be comparable to the DSL service provided in its more populated areas. The network will also be engineered so that it can be easily upgraded at a reasonable cost to meet future needs. More than 1,800 people stand to benefit, as do nearly 70 businesses. In addition to the jobs this project will create upfront, it will help drive economic development and create jobs for decades to come. |

| Applicant Name | State | Award Amount | Project Description |
|---------------------------------|-------|--------------|---|
| Federated Telephone Cooperative | MN | \$2,987,274 | This nearly \$3 million award to Federated Telephone Cooperative will bring a Fiber-to-the-Premise (FTTP) voice, video, and data network to the Rural Morris, Minnesota exchange. More than 950 people stand to benefit, as do 20 businesses. In addition to the jobs this project will create upfront, it will help drive economic development and create jobs for decades to come. |
| Socket Telecom, LLC | MO | \$23,734,482 | This \$23 million award to Socket Telecom, LLC will offer Fiber-to-the-Premise (FTTP) service to households, businesses, and critical community organizations who are currently underserved in mid-Missouri. Approximately 6,500 people stand to benefit, as do more than 260 businesses and 36 community institutions. Socket Telecom estimates the project will directly support 525 jobs upfront, and will also drive economic development and create jobs for decades to come. |
| Utopian Wireless Corporation | MO | \$249,731 | This project, funded through this award of approximately \$250,000, will bring WiMAX infrastructure to rural communities in and around Benton, Missouri. More than 2,600 people, approximately 56 local businesses and 30 community institutions stand to benefit from this improved service. Not only will this project create jobs upfront, it will help drive economic development in the community that creates jobs for years to come. |
| Montana Opticom, LLC | MT | \$64,127,322 | Through this award of over \$64 million, Montana Opticom, LLC will utilize Fiber-to-the-Premises (FTTP) to expand high-speed broadband to rural communities and rural areas within Gallatin County, Montana. More than 18,500 people, approximately 4,100 local businesses and 58 community institutions stand to benefit from this improved service. Montana Opticom, LLC estimates that this project will directly create at least 650 jobs upfront and help drive economic development in the community that creates jobs for years to come. |
| Country Cablevision Inc | NC | \$25,297,000 | The YMRB project, using this award of \$25.3 million, will promote social and economic development in a rural, economically distressed area of North Carolina by delivering critical digital services (TV, data and Voice Over Internet Protocol). More than 33,000 people, approximately 1,900 local businesses and 120 community institutions stand to benefit from this improved service. Not only will this project create jobs upfront, it will help drive economic development in the community that creates jobs for years to come. |

| Applicant Name | State | Award Amount | Project Description |
|---|-------|--------------|--|
| Atlantic Telephone Membership Corporation | NC | \$16,003,418 | Through this award of \$16 million, Columbus County ACCESS will provide an all Fiber-to-the-Premises (FTTP) network for high-capacity data, voice, and video services to critical community facilities and public safety entities. More than 8,700 people, approximately 270 local businesses and 35 community institutions stand to benefit from this improved service. Not only will this project create jobs upfront, it will help drive economic development in the community that creates jobs for years to come. |
| Slic Network Solutions, Inc. | NY | \$27,832,767 | Using award of \$27.8 million, Slic Network Solutions is proposing the construction of 660 miles of fiber optic cable in St Lawrence County, New York. More than 14,000 people, approximately 112 local businesses and 30 community institutions stand to benefit from this improved service. Not only will this project create jobs upfront, it will help drive economic development in the community that creates jobs for years to come. |
| Castle Cable Tv | NY | \$7,168,559 | Funded by award of \$7.2 million, Castle Cable TV, Inc. proposes to extend broadband and other advanced telecommunications services through several communities located in Jefferson and St. Lawrence Counties of New York. More than 5,500 people, approximately 217 local businesses and 12 community institutions stand to benefit from this improved service. Not only will this project create jobs upfront, it will help drive economic development in the community that creates jobs for years to come. |
| Sycamore Telephone Company (Inc) | OH | \$4,149,455 | Using award of \$4.1 million, Sycamore Telephone proposes to build a Fiber-to-the-Home (FTTH) system within the village of Sycamore, the village of Melmore, and the village of McCutchensville. More than 4,200 people, approximately 450 local businesses and 14 community institutions stand to benefit from this improved service. Not only will this project create jobs upfront, it will help drive economic development in the community that creates jobs for years to come. |
| Cimmarron Telephone Co | OK | \$42,379,317 | With this award of \$42.4 million, the Cimmarron Telephone Company project will provide both FTTH and wireless broadband service to underserved areas of Payne, Osage, Creek, Pawnee and Okfuskee counties in Oklahoma. More than 21,500 people, approximately 933 local businesses and 35 community institutions stand to benefit from this improved service. Not only will this project create jobs upfront, it will help drive economic development in the community that creates jobs for years to come. |

| Applicant Name | State | Award Amount | Project Description |
|------------------------------------|-------|--------------|--|
| Monroe Telephone Company | OR | \$5,654,734 | Using this award of over \$5.6 million, the Monroe Telephone Company Project will provide broadband services to unserved areas of Lane and Benton counties in Oregon, adjoining Monroe Telephone Company's current service area using Fiber-to-the-Premises (FTTP). More than 2,300 people, approximately 29 local businesses and 7 community institutions stand to benefit from this improved service. Not only will this project create jobs upfront, it will help drive economic development in the community that creates jobs for years to come. |
| Home Telephone Company, Inc. | SC | \$3,979,868 | Using a award of \$4 million with an additional \$1 million in applicant provided matching funds, the Home Telephone Company project will extend broadband services to several areas of South Carolina's Berkeley, Orangeburg and Dorchester Counties that do not have access to broadband services today. More than 2,700 people and 7 community institutions stand to benefit from this improved service. Not only will this project create jobs upfront, it will help drive economic development in the community that creates jobs for years to come. |
| Tennessee Telephone Company Inc | TN | \$5,150,691 | With this award of \$5.2 million and an additional \$1.7 million in outside capital, Tennessee Telephone Company, a subsidiary of TDS Telecom, proposes a project to bring high-speed DSL broadband service to unserved establishments within its rural service territory, which is comparable to the DSL service provided in its more populated areas. More than 3,500 people, 46 local businesses and 31 community institutions stand to benefit from this improved service. Tennessee Telephone Company estimates that this project will directly create at least 130 jobs upfront and help drive economic development in the community that creates jobs for years to come |
| Millington Telephone Company, Inc. | TN | \$3,806,622 | With this \$3.8 million award, Millington Telephone Company, Inc. proposes to expand high-speed broadband service to rural areas of western Tennessee in portions of Tipton, Haywood and Fayette counties. More than 3,800 people, 53 local businesses and 16 community institutions stand to benefit from this improved service. Not only will this project create jobs upfront, it will help drive economic development in the community that creates jobs for years to come. |

| Applicant Name | State | Award Amount | Project Description |
|--|-------|--------------|--|
| South Central Utah Telephone Association, Inc. | UT | \$9,187,244 | With a \$9.2 million award and an additional \$3.1 million in outside capital, the South Central Utah Telephone Association seeks to leverage its existing infrastructure to expand the reach and adoption of its high speed access and associated voice, video and data services to the rural and remote communities, State and National Parks and Monuments in south central Utah. More than 7,200 people, 212 local businesses and 47 community institutions stand to benefit from this improved service. Not only will this project create jobs upfront, it will help drive economic development in the community that creates jobs for years to come. |
| Chequamegon Communications Cooperative Inc | WI | \$31,098,184 | Using this award of \$31.1 million, Chequamegon Communications Cooperative, Inc. (CCC) will deploy Fiber-to-the-Home (FTTH), providing high speed internet access to communities it serves in northern Wisconsin. More than 10,400 people, 959 local businesses and 35 community institutions stand to benefit from this improved service. Not only will this project create jobs upfront, it will help drive economic development in the community that creates jobs for years to come. |
| Baldwin Telecom, Inc. | WI | \$9,067,898 | This award of \$9.1 million will be combined with \$120,000 in outside capital. The Baldwin Telecom project will build a 109 mile fiber-to-the-home infrastructure in the town of Troy, Wisconsin. More than 3,600 people, 30 local businesses and 2 community institutions stand to benefit from this improved service. Not only will this project create jobs upfront, it will help drive economic development in the community that creates jobs for years to come. |
| Eastcoast Telecom Of Wisconsin, LLC | WI | \$1,669,255 | With this award of \$1.7 million, plus another \$550,000 in outside capital, Eastcoast Telecom of Wisconsin, LLC, a subsidiary of TDS Telecom, proposes a project to bring high-speed DSL broadband service to unserved establishments within its rural service territory. More than 1,100 people, 27 local businesses and 6 community institutions stand to benefit from this improved service. Not only will this project create jobs upfront, it will help drive economic development in the community that creates jobs for years to come. |

| Applicant Name | State | Award Amount | Project Description |
|------------------------------------|-------|--------------|--|
| Grantland Telecom, LLC | WI | \$1,655,504 | With this award of \$1.7 million, plus an additional \$550,000 in outside capital, Grantland Telecom, LLC, a subsidiary of TDS Telecom, proposes a project to bring high-speed DSL broadband service to unserved establishments within its rural service territory. More than 790 people, 12 local businesses and 2 community institutions stand to benefit from this improved service. Not only will this project create jobs upfront, it will help drive economic development in the community that creates jobs for years to come. |
| Scandinavia Telephone Company, LLC | WI | \$1,238,809 | With this award of \$1.2 million, plus an additional \$400,000 in outside capital, Scandinavia Telephone Company, LLC, a subsidiary of TDS Telecom, proposes a project to bring high-speed DSL broadband service to unserved establishments within its rural service territory. More than 1,000 people, 11 local businesses and 5 community institutions stand to benefit from this improved service. Not only will this project create jobs upfront, it will help drive economic development in the community that creates jobs for years to come. |
| Riverside Telecom, LLC | WI | \$818,687 | With this award of \$800,000, plus an additional \$200,000 in outside capital, Riverside Telecom, LLC, a subsidiary of TDS Telecom, proposes a project to bring high-speed DSL broadband service to unserved establishments within its rural service territory. More than 490 people, 6 local businesses and 5 community institutions stand to benefit from this improved service. Not only will this project create jobs upfront, it will help drive economic development in the community that creates jobs for years to come. |
| Cal-Ore Communications, Inc. | CA | \$1,786,400 | Using this award of \$1.8 million, the Cal-Ore Communications project will provide wireless broadband services in California's north central Siskiyou County to a predominantly unserved rural area. More than 4,800 people, 365 local businesses and 27 community institutions stand to benefit from this improved service. Not only will this project create jobs upfront, it will help drive economic development in the community that creates jobs for years to come. |
| Windstream Corporation | GA | \$5,129,575 | This \$5.1 million award with an additional \$1.7 million in applicant-provided match will allow Windstream to extend its broadband network to provide broadband to many currently unserved homes and businesses in Georgia. Windstream Corporation's project stands to benefit approximately 44,000 people. In addition, 2,000 business and nearly 120 community institutions stand to benefit from this project. Not only will this project create jobs upfront, but it will also help drive economic development in the community that will help create jobs for years to come. |

| Applicant Name | State | Award Amount | Project Description |
|---|----------------------------|--------------|---|
| Blue Ridge Telephone Company | GA | \$853,768 | This \$853,768 million award with an additional \$284,590 million in applicant-provided match will allow Blue Ridge Telephone Company, a subsidiary of TDS Telecom, to bring high-speed DSL broadband service to unserved establishments within its rural service territory. Nearly 1,000 people stand to benefit from this project, as well as 16 businesses. Not only will this project create jobs upfront, but it will also help drive economic development in the community that will help create jobs for years to come |
| Winnebago Cooperative Telecom Association | IA (84%) MN (16%) | \$19,632,404 | This \$19.6 million grant will allow the Winnebago Cooperative Telecom Association (WCTA) to provide FTTP for rural portions of about 21 communities in Iowa and Minnesota, and will provide bandwidth of over 5megabytes per second for advanced voice, video, and data services. WCTA's project stands to benefit over 8,000 people. Not only will this project create jobs upfront, but it will also help drive economic development in the community that will help create jobs for years to come. |
| Pottlatch Telephone Company | ID | \$2,013,722 | This \$2 million grant with an additional \$671,241 in applicant-provided match will allow Pottlatch Telephone Company, a subsidiary of TDS Telecom, to bring high-speed DSL broadband service to unserved establishments within its rural service territory in Idaho. Pottlatch Telephone Company's project stands to benefit over 700 people, as well as 10 businesses. Not only will this project create jobs upfront, but it will also help drive economic development in the community that will help create jobs for years to come. |
| People's Telecommunications LLC | KS | \$7,782,123 | This \$7.8 million award will allow People's Telecommunications LLC to construct fiber-to-the premises within its certificated service area, the Kansas telephone exchange of LaCygne. People's Telecommunication's project stands to benefit over 1,800 people. In addition, 50 business and 7 community institutions stand to benefit from this project. Not only will this project create jobs upfront, but it will also help drive economic development in the community that will help create jobs for years to come. |

| Applicant Name | State | Award Amount | Project Description |
|--|---|--------------|--|
| Home Communications, Inc. | KS | \$2,004,879 | This \$2 million award will allow Home Communications, Inc., to construct fiber-to-the-premises throughout the rural portion of the Kansas telephone exchange of Canton. Home Communication's project stands to benefit over 500 people. In addition, 24 businesses and 10 community institutions stand to benefit from this project. Not only will this project create jobs upfront, but it will also help drive economic development in the community that will help create jobs for years to come. |
| West Virginia PCS Alliance, LC | MD (37%) PA (46%) WV (17%) | \$3,268,518 | This \$3.3 million award with an additional \$1.1 million applicant-provided match will allow West Virginia PCS Alliance to provide cost effective high-speed mobile broadband to various rural and low-income areas of the existing NTELOS PCS wireless network in rural Pennsylvania, Maryland, and West Virginia. West Virginia PCS Alliance's project stands to benefit over 185,000 people. In addition, nearly 9,000 businesses and 2,000 community institutions stand to benefit from this project. Not only will this project create jobs upfront, but it will also help drive economic development in the community that will help create jobs for years to come. |
| Somerset Telephone Company Inc | ME | \$5,840,363 | This \$5.8 million award with an additional \$1.9 million in applicant-provided match will allow Somerset Telephone Company, a subsidiary of TDS Telecom, to bring high-speed DSL broadband service to unserved establishments in Maine. Somerset Telephone Company's project stands to benefit 3,300 people. In addition, over 70 businesses and 20 community institutions stand to benefit from this project. Somerset Telephone Company estimates that this project will directly create at least 150 jobs upfront and help drive economic development in the community that creates jobs for years to come. |
| Hartland And St Albans Telephone Company | ME | \$2,009,522 | This \$2 million award with an additional \$669,840 in applicant-provided match will allow Hartland and St. Albans Telephone Company, a subsidiary of TDS Telecom, to bring high-speed DSL broadband service to unserved establishments within its rural service territory in Maine. This project stands to benefit over 1,300 people. In addition, over 25 businesses and 3 community institutions stand to benefit from this project. Not only will this project create jobs upfront, but it will also help drive economic development in the community that will help create jobs for years to come. |

| Applicant Name | State | Award Amount | Project Description |
|--------------------------|-------|--------------|---|
| Big River Broadband, LLC | MO | \$24,382,055 | <p>This \$24.3 million award to Big River Broadband LLC, with an additional \$4.3 million in outside capital will bring High Speed Internet Access to a seven county area in southeast Missouri at download speeds up to 14.4 megabytes per second and upload speeds of 5.8 megabytes per second. Big River will be deploying a wireless broadband network using its existing AWS licensed spectrum along with High Speed Packet Access (HSPA) technology over these licensed frequencies. This technology supports high speed connectivity to the Internet for data, voice and video applications, for both mobile and fixed locations. Big River Broadband's project stands to benefit more than 100,000 people, 7,500 businesses, and 300 other community institutions. Big River Broadband estimates that this project will directly create at least 1,300 jobs upfront and help drive economic development in the community that creates jobs for years to come.</p> |
| Windstream Corporation | MO | \$10,328,319 | <p>This \$10.3 million grant to Windstream Corporation with an additional \$3.4 million of outside capital will allow Windstream to extend its broadband network to provide broadband to many currently unserved homes and businesses. Windstream proposes to use industry standard ADSL2+ (Asynchronous Digital Subscriber Line) protocols that will allow customers to enjoy broadband at speeds of up to 12 Mbps. Windstream's project stands to benefit more than 10,000 people, approximately 200 businesses, and 40 community institutions. Windstream Corporation estimates that this project will directly create at least 225 jobs upfront and help drive economic development in the community that creates jobs for years to come.</p> |
| Finally Broadband, LLC | MO | \$998,000 | <p>This \$1 million award to Finally Broadband, LLC will high quality value priced broadband Internet services to rural families and businesses and high quality discounted broadband Internet services to Community Anchor Points. Finally Broadband's project stands to benefit more than 100,000 people, 7,000 businesses, and 400 other community institutions. In addition to the jobs this project will create upfront, it will help drive economic development and create jobs for decades to come.</p> |

| Applicant Name | State | Award Amount | Project Description |
|---------------------------------------|-------|--------------|--|
| Calhoun City Telephone Company, Inc. | MS | \$2,962,169 | This \$2.9 million grant to Calhoun City Telephone Company with an additional \$987,000 will bring high-speed DSL broadband service to unserved establishments within its rural service territory, which is comparable to the DSL service provided in its more populated areas. Calhoun City Telephone's project stands to benefit approximately 1,300 people, 25 businesses, and 8 community institutions. In addition to the jobs this project will create upfront, it will help drive economic development and create jobs for decades to come. |
| Windstream Corporation | MS | \$1,005,566 | This \$1 million grant to Windstream Corporation with an additional \$335,189 will allow Windstream to extend its broadband network to provide broadband to many currently unserved homes and businesses. Windstream proposes to use industry standard ADSL2+ (Asynchronous Digital Subscriber Line) protocols that will allow customers to enjoy broadband at speeds of up to 12 Mbps. Windstream's project stands to benefit approximately 2,750 people, 25 businesses, and 5 other community institutions. In addition to the jobs this project will create upfront, it will help drive economic development and create jobs for decades to come. |
| Wilkes Telecommunications, Inc. | NC | \$21,611,000 | This \$21.6 million award to Wilkes Telecommunications, Inc. will provide last mile fiber optic high speed broadband, video, and voice services to underserved rural areas in Wilkes County, North Carolina. Wilkes Telecommunication's project stands to benefit approximately 8,500 people, 3,300 businesses, and 45 other community institutions. Wilkes Telecommunications estimates that this project will directly create at least 160 jobs upfront and help drive economic development in the community that creates jobs for years to come. |
| Lumbee River Electric Membership Corp | NC | \$19,947,739 | This \$19.9 million award to Lumbee River Electric Membership Corporation will provide an advance Fiber-to-the-Home (FTTH) broadband services via a high speed fiber optic network designed for speed up to 100 megabytes per second to end users in our rural proposed funded service area. Lumbee River Electric's project stands to benefit approximately 27,000 people, 1,600 businesses, and 100 other community institutions. In addition to the jobs this project will create upfront, it will help drive economic development and create jobs for decades to come. |

| Applicant Name | State | Award Amount | Project Description |
|---|-------|--------------|---|
| Griggs County Telephone Co | ND | \$22,096,041 | This \$22 million grant to Griggs County Telephone Company will use Fiber-to-the-Home (FTTH) technology to bring affordable and reliable broadband access and video services to underserved rural areas in eastern North Dakota. Grigg's County Telephone's project stands to benefit more than 4,000 people, 400 businesses, and 15 other community institutions. Griggs County Telephone Company estimates that this project will directly create at least 248 jobs upfront and help drive economic development in the community that creates jobs for years to come. |
| Southeast Nebraska Communications, Inc. | NE | \$11,285,367 | This \$11.3 million award to Southeast Nebraska Communications, Inc. will construct fiber-to-the-home throughout the rural portion of its certificated service area excluding the town of Falls City. Southeast Nebraska Communication's project stands to benefit approximately 3,000 people, 50 businesses, and 20 community institutions. In addition to the jobs this project will create upfront, it will help drive economic development and create jobs for decades to come. |
| Merrimack County Telephone Company | NH | \$2,021,197 | This \$2 million grant to Merrimack County Telephone Company with an additional \$673,733 of outside capital will bring high-speed DSL broadband service to unserved establishments within its rural service territory, which is comparable to the DSL service provided in its more populated areas. Merrimack County Telephone Company's project stands to benefit approximately 1,800 people and 60 businesses. In addition to the jobs this project will create upfront, it will help drive economic development and create jobs for decades to come. |
| Kearsarge Telephone Company | NH | \$372,532 | This \$372,532 grant to Kearsarge Telephone Company will bring high-speed DSL broadband service to unserved establishments within its rural service territory, which is comparable to the DSL service provided in its more populated areas. Kearsarge's project stands to benefit approximately 250 people and 10 businesses. In addition to the jobs this project will create upfront, it will help drive economic development and create jobs for decades to come. |

| Applicant Name | State | Award Amount | Project Description |
|----------------------------------|----------------------|--------------|--|
| Dell Telephone Cooperative, Inc. | NM | \$435,500 | This \$435,500 grant to Dell Telephone Cooperative, Inc. will provide fiber optic connectivity to a new cabinet and deploy a last mile access system intended to provide broadband services to households in a PFSA located in the southeast area of New Mexico. The PFSA will utilize a copper based ADSL2+ technology to provide broadband data and voice. Dell Telephone's project stands to benefit approximately 100 people. In addition to the jobs this project will create upfront, it will help drive economic development and create jobs for decades to come. |
| Mid-Hudson Cablevision Inc | NY (86%) MA (14%) | \$3,473,919 | This \$3.5 million award with an additional \$1.5 million in applicant-provided match will allow Mid-Hudson Cable to bring high speed broadband to this rural region located in the 75 mile corridor between New York City and the state Capital in Albany. Mid-Hudson Cable's project stands to benefit over 20,000 people. In addition, over 3,000 businesses and 100 community institutions stand to benefit from this project. Not only will this project create jobs upfront, but it will also help drive economic development in the community that will help create jobs for years to come. |
| Nelsonville Tv Cable, Inc | OH | \$4,638,173 | This \$4.6 million award will allow Nelsonville TV Cable to extend HFC Digital Cable Services to unserved areas of Athens, Hocking, and Morgan Counties in Ohio. Nelsonville TV Cable's project stands to benefit over 3,500 people. In addition, over 3,000 businesses and 20 community institutions stand to benefit from this project. Not only will this project create jobs upfront, but it will also help drive economic development in the community that will help create jobs for years to come. |
| New Era Broadband | OH | \$2,954,929 | This \$2.9 million award will allow New Era Broadband to deliver high speed broadband services to unserved communities in rural Appalachian Meigs County, Ohio. New Era Broadband's project stands to benefit over 8,000 people. In addition, 165 businesses and 6 community institutions stand to benefit from this project. New Era Broadband estimates that this project will directly support at least 200 jobs upfront and help drive economic development in the community that creates jobs for years to come. |

| Applicant Name | State | Award Amount | Project Description |
|---|-------|--------------|---|
| Atlink | OK | \$8,547,357 | This \$8.5 million award will allow Atlink Services to provide broadband to 14 rural communities in Oklahoma. Atlink Services' project stands to benefit nearly 4,000 people. In addition, over 1,400 businesses and 6 community institutions stand to benefit from this project. Not only will this project create jobs upfront, but it will also help drive economic development in the community that will help create jobs for years to come. |
| Mid-America Telephone, Inc. | OK | \$1,143,784 | This \$1.1 million award with an additional \$300,000 will allow Mid-America Telephone to bring high-speed DSL broadband service to unserved establishments in Oklahoma. Mid-America Telephone's project stands to benefit nearly 690 people. In addition, 24 businesses stand to benefit from this project. Not only will this project create jobs upfront, but it will also help drive economic development in the community that will help create jobs for years to come. |
| Wyandotte Telephone Company | OK | \$702,933 | This \$700,000 award with an additional \$200,000 in applicant-provided match will allow Wyandotte Telephone Company to bring high-speed DSL broadband service to unserved establishments in Oklahoma. Wyandotte Telephone's project stands to benefit 460 people. In addition, 34 businesses stand to benefit from this project. Not only will this project create jobs upfront, but it will also help drive economic development in the community that will help create jobs for years to come. |
| Utopian Wireless Corporation | OK | \$264,558 | This \$300,000 award will allow Utopian Wireless Corporation to bring WiMAX infrastructure to rural communities in and around Prague, OK. Utopian Wireless Corporation's project stands to benefit over 3,700 people. In addition, over 100 businesses and 33 community institutions stand to benefit from this project. Not only will this project create jobs upfront, but it will also help drive economic development in the community that will help create jobs for years to come. |
| Warm Springs Telecommunications Company | OR | \$5,445,920 | This \$5.4 million award will allow The Warm Springs Telecommunications Company to construct a hybrid fiber/wireless network throughout the Reservation of the Confederated Tribes of Warm Springs. Warm Spring's Telecommunications Company's project stands to benefit over 1,800 people. In addition, over 18 businesses and 22 community institutions stand to benefit from this project. Not only will this project create jobs upfront, but it will also help drive economic development in the community that will help create jobs for years to come. |

| Applicant Name | State | Award Amount | Project Description |
|--|-------|--------------|--|
| Cascade Utilities, Inc. | OR | \$5,197,732 | This \$5.2 million grant will allow Cascade Utilities to place over 127 miles of fiber optic cable along with installing and/or changing out 21 Digital Subscriber Line Access Multiplexers in rural Oregon. Cascade Utilities' project stands to benefit nearly 14,000 people. In addition, over 1,100 businesses and 19 community institutions stand to benefit from this project. Not only will this project create jobs upfront, but it will also help drive economic development in the community that will help create jobs for years to come. |
